Westinghouse WDPF, WEStation and Ovation
Parts and Service

Replacement Hardware:

We carry a large selection of hardware to support your needs. Refurbished parts are available for all Classic WDPF and WEStation systems backed by a one-year warranty. Ovation systems users who have migrated from a WDPF system still need support on their Q-line card I/O, and we have the cards in stock you need. Printed Circuit cards, Q-Line, Power Supplies, Keyboards, Cables, Cages and many other parts at a third to half of what Emerson charges.

Westinghouse Fiber Optic Repeaters:

We stock FORs for your systems that are no longer available through the OEM, and at a fraction of their price when they were still available. Plus, we sell FTC cards and power supplies for spares. Evaluations for repair of the units are free.

Refer to our current stock list for parts you need, but we have more available, so please call when you have a need.

Replacement Keyboards:

New Mylar Keyboard tops are used to refurbish your WDPF operator keyboards, as well as the units we have in stock for spares. WEStation operator keyboards in stock in used but like-new condition. We replace the keyboard power supplies with new, and repair the circuit cards.

Spare Printers:

Both "Used, Like New" and New Printers are available for most systems.

Drives and Storage:

"Used Like New" hard, floppy and tape drives available for many systems. Maxtor XT1085s, SUN 4MM DAT, HP 5200ex, and more.

DT Highway Controllers:

In stock, fully tested and ready to ship – both Classic style and WEStation. Repairs and spares.

Sun Microsystems:

"Used Like New" Sun Sparc5s, Sparc20s, Ultra5s, Ultra10s, etc., with all replacement / upgrade parts you may need.

Repair Services

Our repair services offer rapid turnaround, advanced exchange if needed, full one year warranty and refurbishment of your existing hardware.

We repair:

Power Supplies: DPU, MMI and Brick Style

Printed Circuit Cards: Processor, Data Highway Memory, Graphics and Others

I/O Sets (Q-Line): QAO, QAV, QAW, QBI, QCI, QSE QTO and Others.

Keyboards: WDPF, WEStation and Sun

Printers: Genicom

Other Equipment: Backplanes, Card Cages, Fans, Cables and other peripheral equipment.

Replacement Displays:

We have replacement solutions for all makes and models of displays used on the Westinghouse Family of systems. Our displays can replace Console Mounted, Rack or Desktop style units and offer IR touch screens when needed. Replacement units are direct plug and play displays and require no modifications to your existing systems to use. We supply LCD monitors from 19" to 23" for use on 3BNC Classic systems, 4BNC and 13W3 WEStations, and 15pin Ultra5s. They also run at high resolution on the Ovation systems. Our Replacement units are not only plug and play but can be used to free up valuable desk space with special mounting options to best fit your needs.
